

Installing 360Mediaplayer SteamVR version

Step 1 Download the Zipped folder and Unzip to your local machine

Unzip the folder 360MediaplayerSteamVR to your local machine.

Step 2 Install SteamVR

In case you don't have Steam already installed on your machine, download Steam from <https://store.steampowered.com/> and create an account.

Install SteamVR

<https://store.steampowered.com/app/250820/SteamVR/>

Step 3 Make sure your headset is plugged in to your computer

Make sure SteamVR is running and that your headset is plugged in and SteamVR has identified your headset.

Step 4 Open the 360MediaplayerSteamVR folder and double click
360Mediaplayer.exe

Start 360Mediaplayer by double clicking the 360Mediaplayer.exe file in the 360MediaplayerSteamVR folder that you unzipped earlier. A new window opens where you can choose the resolution and quality based on your headset. We recommend using at least Full HD resolution 1920 * 1080.

Step 5 Continue using 360Mediaplayer in your headset

All done, enjoy content with your VR headset.
