

Installing an apk file to Oculus GO

Step 1 Enable developer mode

To enable developer mode, open your Oculus App on your phone. From your Oculus App select your headset -> **More Settings** -> **Developer Mode** -> **Turn on Developer Mode**

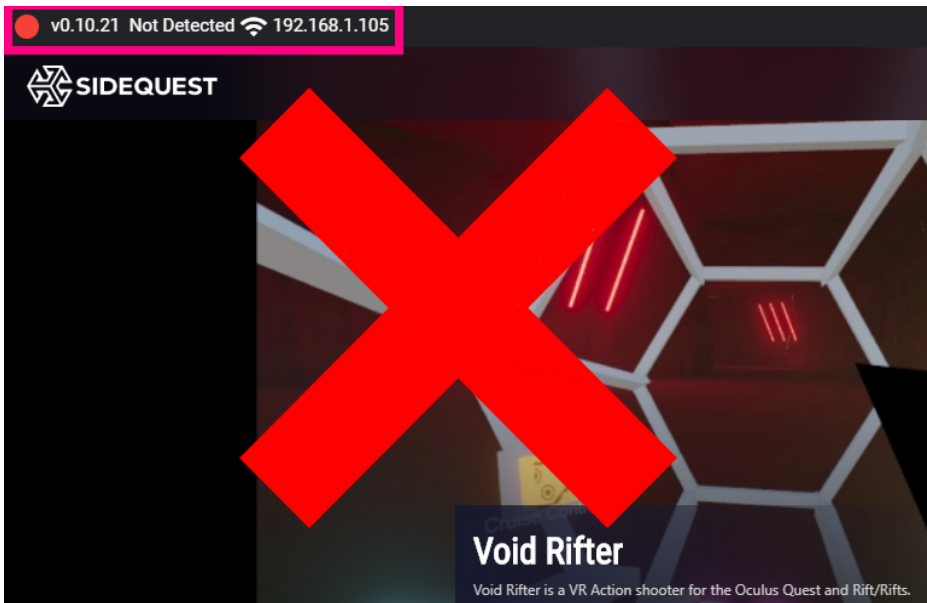

Step 2 Connect headset to PC

Use a USB cable to connect your Oculus GO headset to a PC

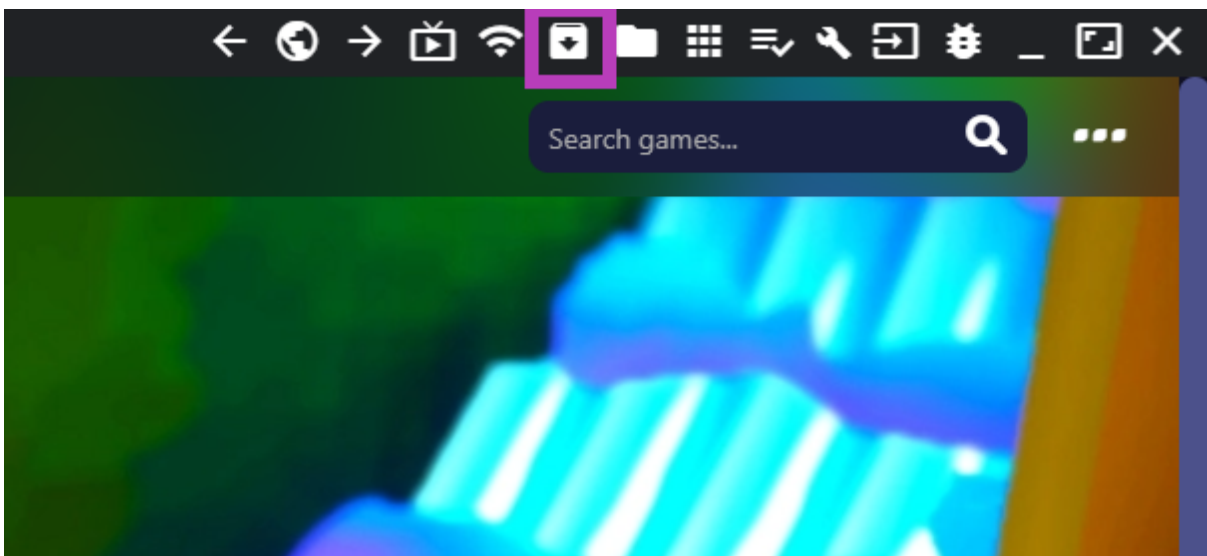

Step 3 Download SideQuest

SideQuest is a pc software that allows you to install external applications to your standalone Oculus device. Download SideQuest from this link: <https://sidequestvr.com/download>. After you launch SideQuest, make sure your device is recognized by looking at the top left corner of SideQuest.

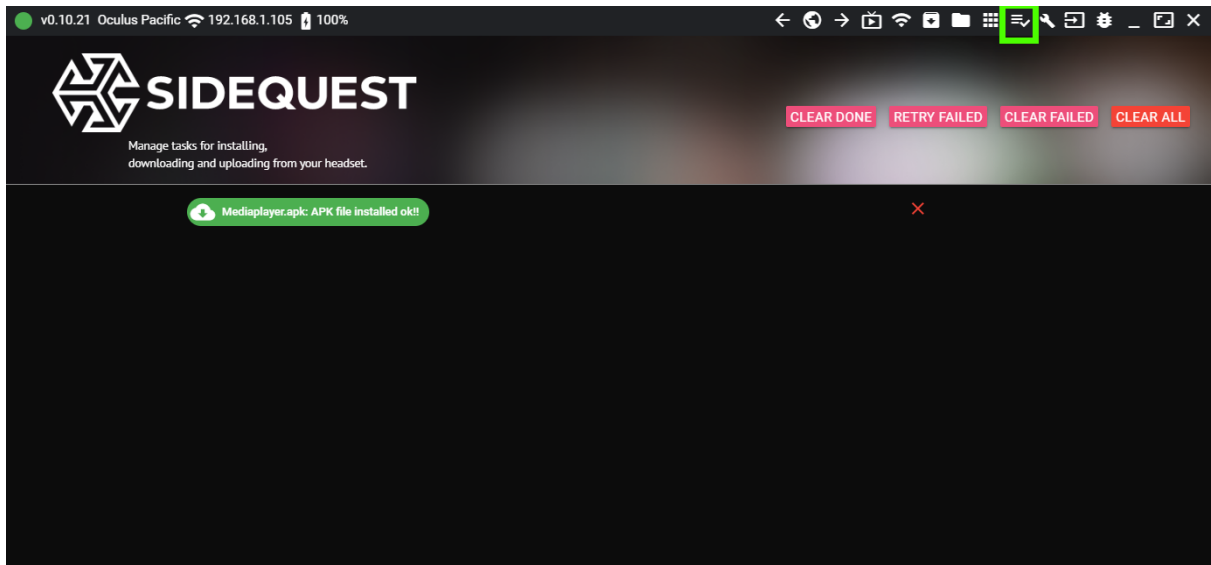

To start the installation process, click **Install APK file from folder on computer**. Navigate to your APK file and select it. The installation process will start.

To track the installation process you can click the Running tasks button

Step 4 Navigate to your app

After the installation is finished, put on your Oculus GO VR goggles and navigate to your app library. If you don't see the application in the library, remember to check the library's Unknown Sources section.
